

The Moorland Composites Ltd Group of Companies fully recognises that it can only achieve its business objectives if the operational performance of its activities, along with the products it supplies, reflects the changing environmental priorities of the society it serves.

For the development of the business, products and services, overall environmental impact criteria and societal values relating to its activities will guide it. To this end, it will engage in the activities listed below.

1. Establish environmental performance standards for its business that fully comply with national legislation and regional or global protocols.
2. Work proactively with responsible organisations, suppliers and customers in the development of manufacturing practises that encourage conservation of the natural environment.
3. Develop management processes and operational procedures etc. to prevent pollution.
4. Progressively improve levels of environmental protection and reduce the waste generated by the operations and commercial activities of the company, promoting recycling or re-use and ensuring that the methods of disposal for unusable waste are safe and create no long-term environmental impact.
5. Minimise the risks of environmental accidents and, in conjunction with appropriate authorities, ensure an emergency response capability to deal with accidental pollution.
6. Support any research directed towards the use of energy efficient and low pollution technology.
7. Assist customers, contractors and suppliers to develop a similar approach to the protection of the environment.
8. Provide the necessary information, training and support to employees to ensure thier ability to fulfil the commitments given in this statement.
9. To support fully all those who, by their actions and commitment, endeavour to ensure this policy is successful.

Signed, for and on behalf of Moorland Composites Limited, and the Moorland Composites Group of Companies:

R D Moore
Managing Director
