

The ductBOX and jointBOX range of access chambers were originally designed for the cable TV industry in which its many benefits are widely recognised. Utility and other market sectors have also adopted the ductBOX and jointBOX for their underground cable duct chamber requirements. A comprehensive combination of clear opening sizes and depths are available in the ductBOX and jointBOX ranges.

These cost saving GRP chamber systems are rapidly installed to create an integrated load bearing structure which provides excellent access to services. They out-perform traditional concrete or brick construction methods in every respect providing the optimum solution for the specifier and installer alike. Single pass construction of network systems speeds up installation flow dramatically. With the ductBOX and jointBOX range of chambers, project management is simplified, the need to site supervision is reduced and disruption is kept to a minimum.

## ductBOX

Product Reference	Clear Opening (mm)	Base Size (mm)	Depth with C&F (mm)
P38/1	380 x 230	590 x 440	380
P52/1U	520 x 190	550 x 220	375
P55/3	550 x 315	800 x 565	580
P55/2M	550 x 315	680 x 445	510-560
P60/3	600 x 450	750 x 600	580
P73/4	730 x 460	1000 x 760	700
P91/2	918 x 445	1220 x 750	500

## jointBOX

Product Reference	Dimension A	Dimension B	Dimension C
JB23	512	277	482
JB26	698	349	565
